

SUMMARY

Software Engineer with experience designing and developing scalable backend applications, REST APIs, data pipelines, and cloud-based systems using Java, Python, SQL, and AWS. Experienced collaborating with cross-functional teams to translate business requirements into technical solutions and delivering reliable software in agile environments. Strong foundation in object-oriented programming, API integration, software design, distributed systems, and cloud platforms, with a passion for solving problems through technology. Excited to combine technical development with customer-facing consulting by helping organizations design, implement, and integrate enterprise software solutions.

WORK EXPERIENCE

Software Engineer | iPowerUp Labs

Oct 2025 - Present

- Developed and maintained software for smart solar charging products, including device-to-app communication, real-time battery monitoring, and APIs for energy usage tracking and system telemetry in an IoT-enabled environment.
- Designed and implemented mobile and backend features that integrated real-time hardware sensor data, improving system visibility into battery health, power flow, and overall device performance across connected applications.
- Collaborated with hardware engineers and product teams in an early-stage startup setting to define requirements and support end-to-end system architecture decisions for scalable smart charging solutions.
- Document technical solutions and participate in design discussions to support maintainable, scalable software.

Software Engineer | Electronic Arts

Jul 2020 - Mar 2024

- Developed backend services for a Content Trust & Safety platform, powering UGC moderation across major titles (*Apex Legends*, *EA Sports FC & Battlefield*), improving player experience and reducing harmful interactions by 85%.
- Spearheaded VoIP Reporting system (0→1), enabling real-time player reporting and voice moderation workflows, reducing case backlog by 65% and significantly improving incident resolution SLAs.
- Built Player Trust Score system using behavioral modeling and ranking signals, directly influencing positive player behavior modification and building safe and healthier user engagement.
- Developed ETL pipelines using Python, AWS, and Airflow, processing high-volume user interaction and telemetry data across distributed systems, improving data & pipeline reliability and reducing incident response time by 80%.
- Created ML model evaluation framework comparing accuracy, cost, latency, and scalability for deployment decisions.
- Built dashboards tracking KPIs and user behavior insights, supporting product decisions and engagement strategies.
- Collaborated with software architects, product managers, and data scientists to evolve system architectures and align implementation with long-term platform roadmaps.
- Implemented observability and monitoring systems using Prometheus and Grafana that improved service reliability.
- Authored technical documentation, API specifications, system design & workflow diagrams, and operational runbooks to improve cross-team knowledge sharing and onboarding efficiency.
- Participated in code reviews, design reviews, RCA, & software quality initiatives to promote engineering best practices.

SKILLS

Programming Languages & Frameworks: Java, Python, C++, JavaScript, SQL, Spring Boot, Node.js, React, HTML, CSS

Software Engineering: Object-Oriented Programming, REST APIs, API Integration, Microservices, Distributed Systems, Event-Driven Architecture, Solution Design, System Design, Cloud-native Architecture, OAuth2, JWT Authentication

Cloud & DevOps: AWS, Azure, GCP, Docker, Kubernetes, Terraform, Helm, Infrastructure as Code, Jenkins, Linux, CI/CD

Data Engineering: ETL Pipelines, Airflow, Kafka, Spark, Snowflake, Databricks, SQL/NoSQL Databases, Data Modeling

Testing & Observability: JUnit, Mockito, Cypress, JMeter, Monitoring, Logging, Prometheus, Grafana

AI & Development Tools: GitHub Copilot, Claude, Cursor, Generative-AI assisted Development

Project: Agile, Jira, Confluence, Technical Documentation, Stakeholder Management, Cross-Functional Collaboration

EDUCATION

MBA with Business Analytics Hult International Business School, United States	2024 - 2025
B.Tech in Electrical Engineering Indian Institute of Technology Hyderabad, India	2016 - 2020
